

# ENGINEERING SERVICES MOÇAMBIQUE

EnSerMo was established in order to provide quality engineering services to the mines and processing plants in Moçambique as well as ports, harbours and various other industrial applications. All artisans are highly trained and expertly qualified to deliver on all client needs in a timeous manner.

EnSerMo has a very simple philosophy: all engineering solutions are tailored for each individual client's needs. EnSerMo's capabilities expand a full array of engineering services as and when clients need them, from upgrading to fabrication of steel structures.
